7. Garment Bag, PLIQUO, £160

A suit bag is essential for any serious business trip, but traditional full-sized garment carriers can be awkward and unwieldy. PLIQUO's garment bag not only lets you origami your suit into a shape that fits neatly inside any travel bag, but ensures that your tailored wool jackets (linens are a lost cause) come out as crisp as they were when packed. Made to meet airline carry-on requirements, this garment bag packs a suit down to a size not much bigger than a laptop bag (you can carry it like a briefcase on board or stuff it inside a bigger vessel). It's specially made hanger folds horizontally from tip-to-tip meaning there's room enough for a pair of trousers and jacket or shirt. Not convinced? Watch [this YouTube video](#).
